INTRODUCTION

The First workshop on Microbiology will be a Hand-on & Hand-on alone. There will be no formal lectures. There will only be discussions and that too be on the practical work.

A booklet having "SOPs" will be provided in advance to the participants. URINE, PUS and BLOOD will be processed for culture and sensitivity. Information to "clinician" will be provided on daily basis with the final report generated after 2 ½ days.

Demonstrations on important clinical pathogens, self-explanatory, will be displayed to provide maximum exposure to clinical microbiology.

Medical students(MBBS/BDS & MLT) are welcome to watch demonstrations only at fixed timings.(Please contact the organizing committee)

AIMS AND OBJECTIVES

- AROUSE interest in the diagnostic microbiology
- STANDARDIZE microbiology practices
- PREPARE for the QUALITY CONTROL programme to be launched.
- Provide necessary and timely microbiological information for correct management of infected patients.

PROGRAMME OF THE WORKSHOP

The three day workshop programme includes:

- Processing of URINE, BLOOD & PUS.
- Final Interpretation and reporting
- Demonstrations on important clinical pathogens

PARTICIPANTS

Members of faculty from all medical colleges and medical technologists who are interested to learn and gain experience in Diagnostic Microbiology will be selected after nomination by the Head of Their respective Institutions-anyone between a professor and technologist.

DEADLINE FOR REGISTRATION & PAYMENT

15th January 2011

Note: All the Participants will be notified regarding there selection by 22nd January 2011 .A booklet having "SOPs" will be provided in advance to the participants. Detailed programme of the workshop will be notified later on the website.
